Disclaimer

This report is based on publicly available information. It is not intended as an offer to buy or sell, nor is it a solicitation of an offer to buy or sell the securities mentioned. The information and opinions in this report were prepared by the NAEEM Research Department ("NAEEM") from sources it believed to be reliable at the time of publication. NAEEM accepts no liability or legal responsibility for losses or damages incurred from the use of this publication or its contents. NAEEM has the right to change opinions expressed in this report without prior notice.

This research report (including all appendices) contains information that is intended to be conveyed only to the intended recipients, which insofar as the United States is concerned, are "major U.S. institutional investors" (i.e., U.S. institutional investors having total assets under management in excess of USD100 million, or investment advisers that are registered with the U.S. Securities and Exchange Commission and have total assets under management in excess of USD100 million). If the reader or recipient of this research report is not the intended recipient, please notify Naeem immediately, and promptly destroy this research report without retaining any portion in any manner. The unauthorized use, dissemination, distribution or reproduction of this research report by any person other than the intended recipient is strictly prohibited.

Analyst Certification

The primary research analyst/analysts covering the company (or companies) mentioned in this report certify that their views about the company (or companies) and their securities are accurately expressed. Further, no part of their compensation, whether pecuniary or in-kind, was, is, or will be, directly or indirectly related to the recommendations or views expressed in this research report. Unless otherwise stated, individuals listed on the front cover/page of the report are the research analysts.

Stock Ratings

NAEEM believes that an investor's decision to buy or sell a stock should depend on individual circumstances (including, but not limited to the investor's existing holdings and financial standing) and other considerations. Different securities firms use a range of rating terms and rating systems to describe their recommendations. Investors should carefully read the definitions of the ratings used in each report. In addition, since NAEEM's research reports contain complete information about the analyst's views, investors should read NAEEM reports in their entirety, and not infer the contents from the ratings alone. Ratings (and/or research) should not be relied upon as an investment advice.

NAEEM assigns ratings to stocks on the following basis:

<u>Rating</u>	<u>Upside/Downside potential</u>	<u>Rating distribution as of 24 February 2016</u>

ACCUM.	>10% to 20%	11%
